"**Rogue Pulse / Gravity Collapse**" comes in the form of a ten (10) CD boxset, accompanied by a booklet, one off artist prints, and other media. A digital download will be included with the physical copy, which includes high quality images and scans of all media. The dense, physical housing of "**Rogue Pulse / Gravity Collapse**" reveals nearly twelve hours of esoteric sounds from a plethora of international producers, sound artists, bands, activists and all working in everything from noise, electro, trap, experimental electronics, industrial, esoteric metal, synthwave, musique concrete, field recordings, indigenous synthpunk, and many other electronic styles. Almost all of the compositions were produced specifically for this document, within a three month window of opportunity for the participating artists. This document serves both as a vast (yet obviously incomplete) document of contemporary and modern artists pushing the limits of esoteric, political, radical, and lucid strategies of sound, space and resistance as well as strives to create a dialogue around creating an alternative nexus of artist and musician solidarity through models bridging the gap between artistic documents and radical modes of resistance, fundraising, networking and solidarity.

"**Rogue Pulse / Gravity Collapse**" is limited to an edition of 300 signed and numbered physical editions as well as 30 signed and numbered pre-order editions with bonus material.

The cover art is designed by Los Angeles based artist LEXX VALDEZ.

Interior Art / layout by Malocclusion with additional art from Gera Lozano and Adrian Saenz
